

The Southern Ocean

A ring to bind them all in the darkness

Sponsored by the Bolin Centre for Climate Research RA1

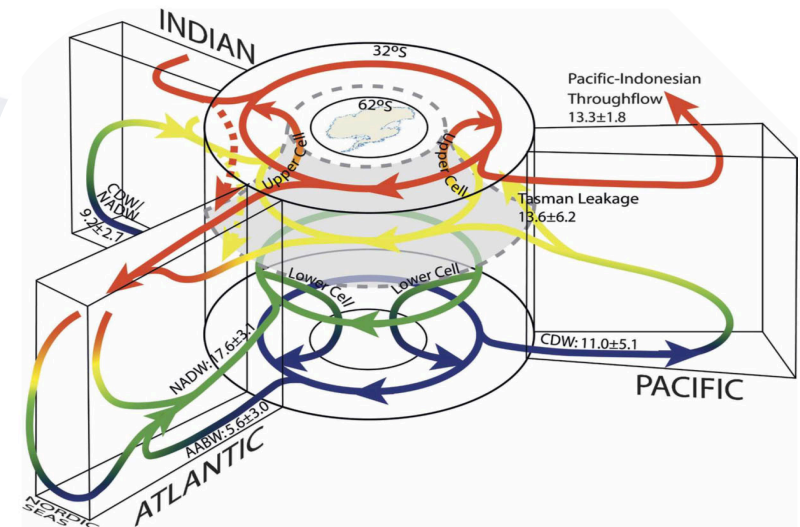

When: Monday 9 and Tuesday 10, October 2017

Where: MISU, C609 Rossbysalen (Arrhenius laboratoriet)

This workshop aims at bringing together physical oceanographers to share their latest work on the Southern Ocean and create new scientific synergies both at the Swedish and at the international level.

Topics of interest include:

- Antarctic Circumpolar Current dynamics
- Frontal structure and eddy activity
- Water mass formation/transformation
- Ocean-ice shelf interaction
- Climate change in the Southern Ocean

Register by sending an email to Fabien Roquet (roquet@misu.su.se) before September 22
