

Welcome to

Careers Day in Science 2012

in Aula Magna, Thursday 6 December
expo 12.00-15.30 and mingle 15.30-16.30

What does the **job market** look like today for our students?

What qualities do the **employers** look for in our students?

What do the employers know about what our students get in their **education**?

This year, for the first time, The Careers Day offers you as a teacher/researcher/ PhD-student the chance mingle with representatives from work places that need scientific skills. Take this opportunity to find out more about the job market for science students. Snacks, beer and wine will be served.

[Register here for mingle before December 4th!](#)

This link will take you to Adobe Formcentral and NOTIS registration form.

Welcome!

NOTIS in collaboration with the Faculty of Science

NOTIS – science and technology in society

A collaborative project between the Faculty of Science at Stockholm University, KTH and StAF, financed by the European Social Fund and running from 2012 to 2014.

Project leaders Stockholm University
