

Discover the Future

8 Leading Positions at SciLifeLab

SciLifeLab is a collaboration between four universities in Stockholm and Uppsala, Sweden: Karolinska Institutet, KTH Royal Institute of Technology, Stockholm University, and Uppsala University. SciLifeLab is a national centre for large-scale biosciences with focus on health and environmental research. The centre combines advanced technical know-how and state-of-the-art equipment with a broad knowledge in translational medicine and molecular bioscience.

SciLifeLab is now looking to recruit eight outstanding young group leaders to further strengthen the research environment at the Stockholm and Uppsala sites.

**Karolinska
Institutet**

- Two positions as Assistant Professor in Biomedical sciences

- Assistant Professor in Microbial Bioenergy Production
- Assistant Professor in Applied Physics

**Stockholms
universitet**

- Assistant Professor in Ecological Genomics
- Assistant Professor in RNA biology

**UPPSALA
UNIVERSITET**

- Assistant Professor in Molecular Medicine
- Assistant Professor in Molecular Biosciences
