Francis Crick Institute
Research Group Leaders
at the London Research Institute

Computational biologists

The Francis Crick Institute

http://www.crick.ac.uk

The Francis Crick Institute will open at St Pancras in central London in 2015. Its research will use interdisciplinary approaches to investigate the biology of human health and disease, supported by core funding from CRUK, the MRC, and the Wellcome Trust, and by grants from UK and international funding agencies.

The Crick is expanding Computational Biology research as a key component of its scientific strategy. The institute will offer an outstanding environment for computational research, with excellent opportunities for wet/dry collaborations across the range of biomedical and clinical research disciplines, supported by a strategic alliance with the Wellcome Trust Sanger Institute. The new Crick laboratories will feature excellent computational facilities including a state-of-the-art data centre.

The London Research Institute

http://www.london-research-institute.org.uk

The London Research Institute (LRI) is the largest Cancer Research UK research institute, with 40 research groups focusing on fundamental cancer biology. The Institute is based in well-equipped laboratories at Lincoln's Inn Fields in central London, and at Clare Hall in Hertfordshire.

The LRI recruitment process for 2013 will carried out jointly with the Crick Institute. We shall appoint outstanding scientists seeking to establish independent and innovative research programmes focussed on:

Computational Biology in Cancer
using approaches such as
Bioinformatics, genomics, systems biology, mathematical modelling, image analysis

Informal enquiries may be made by e-mail to
Nicholas.Luscombe@cancer.org.uk

Newly appointed group leaders will receive core funding for research personnel, travel and consumables, and access to the Institute's comprehensive computational core facilities, backed by competitive employment terms. The new group leaders will move to the Crick laboratories in 2015.

Applications should include the following files, in .pdf format, and should be submitted online at
https://lrigroupleader.cancerresearchuk.org

1. Complete CV
2. Publication List (please separate primary papers and review material)
3. Long-term vision for your research programme (approx 500 words)
4. Past and Future research plans (approx 2000 words)
5. Names and contacts of at least 3 academic referees

YOUR REFEREES will be instructed to submit letters of recommendation online at the time the application is received.
APPLICATION DEADLINE: November 22nd 2013
