

SBW

swedish
bioinformatics
workshop
2015

September 24th - 25th
STOCKHOLM

KEYNOTES

Dr. Lennart Martens

**Our heaven is their hell:
When data is easy but
the results are not**

Dr. Kári Stefánsson

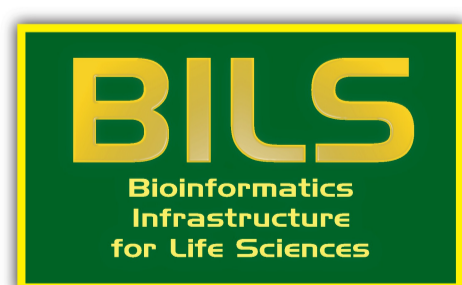

**The sequences of the
genomes of a nation:
What do they tell us?**

ABOUT

The Swedish Bioinformatics Workshop is a two day conference held every year in Sweden at alternating university locations. The main target audience of SBW is PhD students in Sweden working in the diverse field of bioinformatics. At the event young researchers get to present their own projects in front of their peers, either as an oral presentation or in the form of a poster. Additionally, participants can choose from practical workshop sessions of their interest as well as to listen to high impact keynote speakers.

No registration fee for PhD students, postdocs and master's students.
