

Developer for bioinformatics web applications

Are you a skilled developer with a desire to make a real difference? Do you have experience working with bioinformatics? Can you make large amounts of data easily explorable using web-based applications? Then you might be Intomics' new developer for bioinformatics web applications.

Intomics is specialized in deriving core biological insights from analysis and integration of biomedical big data. Through the use of world-leading expertise, value-added data sets, and a unique systems biology platform, we help the pharmaceutical industry discover new biomarkers and drug targets, improve translational research and realize their precision medicine ambitions.

We are looking for a developer with excellent programming skills and experience with web based user interface design to develop products visualizing and making exploration of biomedical big data easy and comfortable.

Our preferred candidate has the following profile:

- Strong programming skills in JavaScript and Python
- A solid knowledge and understanding of HTML5, CSS and other web technologies
- Familiarity with Linux and SQL
- Team spirit and ability to interact professionally with our clients
- Strong reporting and documentation skills
- A background or experience in bioinformatics is an advantage

At Intomics we use Linux for our servers, Mac OS X for our workstations, and in addition to the tools and technologies mentioned above we use Apache, Git, Perl, Django, PostgreSQL and R. The ideal candidate will have knowledge of any of these as well as an interest in science, in particular molecular biology, bioinformatics, systems biology, graph theory, or text mining.

Examples of well working web designs that the candidate has contributed to will also be an advantage.

Intomics offers an exciting and challenging job, where you get the opportunity to develop your skills and qualifications, applying them to relevant research. You will get to work with interesting projects in collaboration with our clients and your colleagues. Intomics A/S offers a competitive salary and a friendly working environment.

Please send your motivated application, CV and references (pdf format recommended) to applications@intomics.com with "*Application-1601 Developer for bioinformatics web applications*" in the subject field **no later than Friday, April 1, 2016**.

All interested candidates irrespective of age, gender, race or religion are encouraged to apply. Enquiries about the position can be made to Rasmus Borup Hansen, tel: +45 88807979. Information about Intomics can be found at <https://www.intomics.com>.

Intomics A/S, located in Lyngby, North of Copenhagen, Denmark, is a contract research organization that specializes in providing tailor-made solutions within data mining, bioinformatics and systems biology for the pharmaceutical industry.
