

# Bioinformatics application developer

*Are you a skilled developer with a desire to make a real difference? Do you have experience working with big data and systems architecture? Can you make large amounts of data easily explorable using web-based applications? Then you might be Intomics' new developer for bioinformatics applications.*

Intomics is specialized in deriving core biological insights from analysis and integration of biomedical big data. Through the use of world-leading expertise, value-added data sets, and a unique systems biology platform, we help the pharmaceutical industry discover new biomarkers and drug targets, improve translational research and realize their precision medicine ambitions.

We are looking for a developer with excellent programming skills to develop rich, web-based products visualizing and making exploration of biomedical big data easy and comfortable.

The candidate must fit well with our existing team, and, in addition, have the following profile:

- Strong programming skills in JavaScript and Python
- A solid knowledge and understanding of HTML5, CSS and modern web technologies
- Familiarity with Linux and database theory
- Team spirit and ability to interact professionally with our clients
- Can both design application structures and work with structures designed by others
- Strong reporting and documentation skills
- A background in or experience with C programming is an advantage

At Intomics we use Linux for our servers, macOS for our workstations, and in addition to the tools and technologies mentioned above we use Apache, Docker, Django, Git, Neo4j, Node.js, Perl, PostgreSQL and R. The ideal candidate will have knowledge of any of these as well as an interest in science, in particular computer science, bioinformatics, or text mining.

Examples of well working applications the candidate has contributed to will be an advantage.

Intomics offers an exciting and challenging job, where you get the opportunity to develop your skills and qualifications, applying them to relevant research. You will get to work with interesting projects in collaboration with our clients and your colleagues. Intomics A/S offers a competitive salary and a friendly working environment.

Please send your motivated application, CV and references (pdf format recommended) to [applications@intomics.com](mailto:applications@intomics.com) with "*Application-6473 Bioinformatics applications developer*" in the subject field **no later than Friday, January 6, 2017**.

All interested candidates irrespective of age, gender, race or religion are encouraged to apply. Enquiries about the position can be made to Rasmus Borup Hansen, tel: +45 88807979. Information about Intomics can be found at <https://www.intomics.com>.

*Intomics A/S, located in Lyngby, North of Copenhagen, Denmark, is a company that specializes in providing tailor-made solutions within data mining, bioinformatics and systems biology for the pharmaceutical industry.*
