

Your talent can  
make a difference.

Make cancer  
history.

You're  
a visionary  
Scientist.

Miltenyi Biotec continues to grow. Our corporate culture encourages you to shape your own ideas and to create a new dynamic. Welcome to a team that thrives on innovation.

## Bioinformatician/Software developer in the field of personalized cancer immunotherapy (m/f)

### Your role:

- As a member of our Bioinformatics group you develop software in the context of personalized cancer immunotherapy.
- You follow the guidelines for development and validation of software in a clinical environment to fulfill this task.
- You develop innovative methods and algorithms for the analysis of high content data such as from Next Generation Sequencing (NGS) or proteomics experiments.
- You work in an interdisciplinary team and liaise and dialog closely with other departments including R&D, software engineering, and IT.
- You develop and implement your own creative ideas accelerating the field of personalized cancer immunotherapy.

### Your profile:

- You have successfully finished an academic education in computer science, bioinformatics, mathematics, physics, statistics or similar and have ideally gained relevant scientific experience in an industry or clinical setting.
- You have profound experience in programming (e.g. Python, R, C++, Java, Linux shell scripting, and/or other languages) and statistics applied to life-sciences and in a clinical/regulated environment.
- Basic knowledge in cell biology, immunology or oncology is advantageous.
- Excellent communication skills, the ability to work within a team and very good English language skills complete your profile.

### What we offer:

- ... A modern workplace and exciting opportunities in the development of technologies with a secure future
- Cross-border intercultural cooperation and short communication channels
- A collegial corporate culture and flexible working hours enable time management on your own terms
- Personalized employee development program: specialist and personal training courses provided by our own training academy
- Diverse corporate benefits with regard to employee health, sport, and staff events

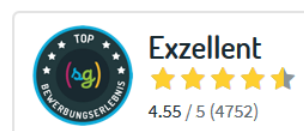

Progress prospers with inspiration and curiosity. For 30 years Miltenyi Biotec has been developing products and services that are used in basic research, translational research and cell therapy. Today we are a team of more than 2,200 scientists, physicians, engineers, marketers and numerous other specialists present in 28 countries worldwide. At Miltenyi Biotec, innovative ideas are being turned into cutting edge products. Together, we are passionate about driving biomedical progress towards curing severe diseases.
